

# Kick-start your engineering career

Graduate and internship opportunities

# At Milmeq we achieve the impossible every day.

We develop leading edge, pioneering technology for the protein processing industry serving a global client base. But to do this we need the best and brightest people in the industry.

People are the heart of our business and having the right people with the right attitude is the driving force behind everything we do.

Every year, we recruit interns and graduate engineers from New Zealand's top universities to become a part of the Milmeq story.

## FROM THE CLASSROOM TO THE WORKSHOP

Milmeq engages with New Zealand's top universities to recruit interns and graduates, offering scholarships, grants and ongoing development for successful candidates.

### SCHOLARSHIPS

Second and third year engineering undergraduates studying mechanical, electrical, process or mechatronics engineering at Auckland and Canterbury Universities can apply for one of our two scholarships: the Auckland University Milmeq Scholarship or the Canterbury University Engineering Scholarship.

The Milmeq Scholarship offers \$3,000 towards tuition fees for a student interested in primary food processing and low temperature materials handling systems.

Recipients for both scholarships also have the opportunity to go on to summer intern work.

### INTERNSHIPS

Each year Milmeq offers between two and four summer internships, primarily located at our Auckland or Dunedin sites.

Our internships are hands on, and give engineering students the opportunity to work alongside some of the best in the business, across a range of R&D and specialty engineering projects.

An internship also goes towards the 400 practical and professional hours required in university degree courses.

### FINAL YEAR PROJECTS

Milmeq assists students at Auckland, Canterbury, AUT, Massey and Waikato Universities to complete final year projects. Get in touch to find out more.

### CONNECT WITH US

#### UNIVERSITY OF CANTERBURY ENGINEERING CAREERS DAY:

Are you a student in your third or fourth year of undergraduate study? Come and speak to one of our team at Careers Day about opportunities for internships and graduate positions.

#### AUCKLAND UNIVERSITY SPECIALISATION EVENING:

Meet with our team to learn about the specialisations and careers pathways Milmeq can offer.

### GRADUATE RECRUITMENT

At Milmeq we value the flow of fresh ideas and energy so each year we actively recruit up to two graduate appointments – one for each of our New Zealand sites.

Recruitment begins in May for employment starting in November.

We target recruitment from our interns and scholarship recipients, as well as opening up applications to other final year engineering students, prior to the completion of undergraduate study.

## WHAT WE LOOK FOR

- > Strong academic background in a key specialisation relevant to Milmeq, complemented by some practical experience and a passion for engineering
- > Ambition, drive, energy and the desire to learn and grow professionally
- > Strong interpersonal and communication skills
- > Ability to work with and across multiple teams and build long-term relationships
- > Strong alignment with Milmeq's values and core beliefs

## GRADUATE DEVELOPMENT: WHAT WE OFFER

Milmeq offers professional growth through a structured graduate development programme focused on skill and personal development.

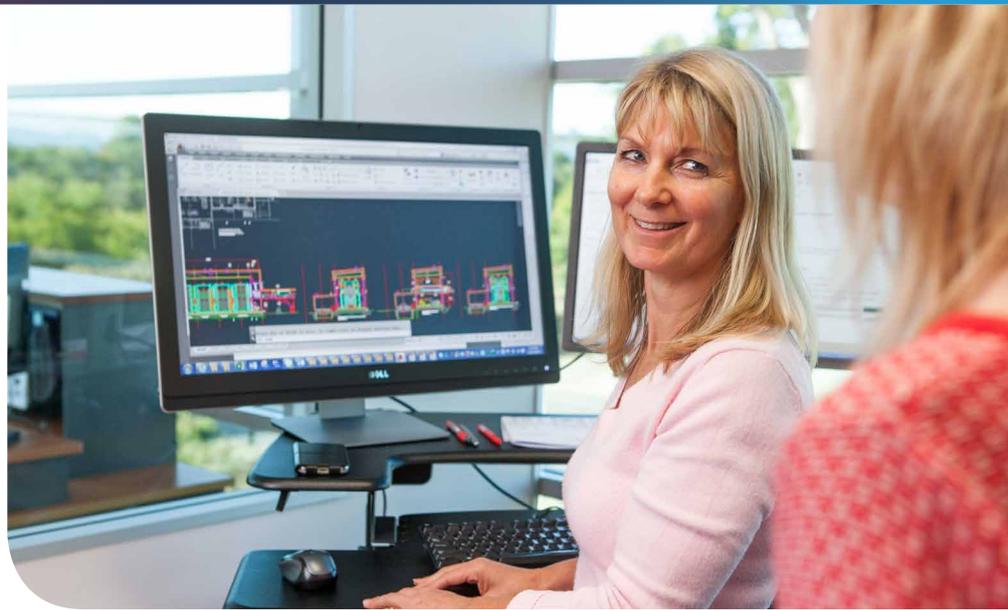

We offer a range of graduate positions, including; design, R&D, controls/automation and projecting, and also offer secondments to all our offices based in Dunedin, Auckland and Brisbane.

Our focus is on the job learning through targeted assignments designed to round out the engineering experience over the course of the two year programme.

As a Milmeq Graduate, you'll get full exposure to a range of projects, businesses and engineering developments while enjoying the benefits of a competitive remuneration package, wellness days and an active social staff programme.

We'll provide you with a dedicated mentor for guidance, as well as a "buddy" who will assist with integration into the company.

You'll also get graduate membership to IPENZ and support to gain professional registration and chartership.
